

# FASTMAN BRIDGE CONNECTOR

## Managed Moves and Updates in your OpenText Content Suite and Extended ECM Environment

- ✓ Manage moves of content from one or more places within Content Suite or Extended ECM to a new location
- ✓ Add / update categories and attributes, file name changes, permission changes, and clean-up empty folders
- ✓ Save time and eliminate the error-prone manual process.

Fastman Bridge Connector allows you to complete operations such as data migration or move content from one or more locations in your Content Suite to another with either existing or updated metadata and permissions, with less effort and eliminating error-prone manual processes.

## Quick access to your team's assignment

An intuitive dashboard shows all running jobs, status, and quick access to your team's assignments. This tracks the progress of the managed moves and guides the business analyst through the processing steps to ensure enhanced quality control.

## Flexibility and increased collaboration

Managing multiple users with a large number of documents and folders can be difficult for organisations. Fastman Bridge Connector increases collaboration by allowing multiple business users to update and quickly add additional metadata to content.

## Leveraging Fastman's powerful tools

The Fastman Bridge Connector leverages our Bulk Data Manager and Permissions Manager tools. Bulk Data Manager reduces the cost and complexity of migrations, while the Permissions Manager enables administrators and power-users to quickly identify, address, and avoid information leaks.

 **Workflow Step: 05. Bulk Data Manager**

Collection move

General ⓘ

Instructions:  
Managed Move workflow - update categories  
This is a manual process step. Launch Bulk Data Manager from the URL below, and perform manual mapping of attributes using BDM. Use a Saved Search called Managed Move 2020.06.18-09:11:49-Admin as the input to find the items to modify in BDM.  
[http://cs162-test.fastman.net.au/FCS\\_BDM\\_SmartClient.publish.htm](http://cs162-test.fastman.net.au/FCS_BDM_SmartClient.publish.htm)  
When you have finished adding categories, return to this Workflow Assignment, and click Send On.

Apply Reset Send On

## Bulk Data Manager connection

Integration with the Bridge Connector allows you to launch Bulk Data Manager from any Content Suite workflow step to complete the task. This automatically displays saved searches and quickly updates the attributes for processing.

## Permission Manager connection

The Bridge Connector allows you to launch Permissions Manager from the workflow step to complete the task. Permissions Manager displays the relevant Move content access rights and lets you quickly make any changes.

If you want to manage moves of content from one or more places within Content Suite or Extended ECM to a new location, Bridge Connector is an essential component within your operations.
